Custom Coin Design Instructions

D. Coin Artwork- Provide your logo or other artwork for both sides of your coin.

Simply e-mail your logo file to our design team at design@iuncoins.com along with any instructions.

Artwork Guidelines

- Files should be sent in Illustrator format with the “create PDF compatible” option de-selected. All fonts should be converted to outlines or included with the artwork files. If you do not have an Illustrator file, please provide a layered Photoshop file with the Layer Styles intact. The next best option would be an .EPS followed by a .PDF and then a .jpg.
- For the closest color matching, review the attached color chart and provide the color identification codes for those colors that best represent your logo or artwork.
- Please make sure that all files contain your organization name so our design team can best organize the files they receive.

What Comes Next?

- **Proof Review-** Once our design team reviews the provided information, and receives the artwork you provide, they will get to work so you can view a proof of your custom coin within 3 days.
- **Proof Corrections/Changes-** After you review the proof and provide feedback to our design team, we will make any changes or corrections you request. We will keep at it until you are satisfied.
- **Coin Approval-** When you are happy with the coin design, you will sign off on the design artwork and this will give us the green light to proceed with your custom coins.
- **Delivery-** Once your coin artwork is approved, your custom coins will arrive within 10 days!
